EDUCATION

Seneca Polytechnic

Computer Programming & Analysis

Toronto, Ontario

Graduation: August 2027

EXPERIENCE

Incoming Software Developer Co-Op

Fall 2026

Ontario Public Service (MPBSDP, Cluster Applications Branch)

Software Engineer Intern

Summer 2026

Sikh Sparks

- Architected social media management platform adopted by 100+ Sikh organizations across Toronto, unifying content scheduling and cross-posting into a single system to eliminate per-platform workflows.
- Cut cross-platform publishing time by 60% by implementing adapter-pattern layer in Spring Boot, normalizing 3+ platform APIs into one posting service, saving organizations an estimated 2 hrs/week.
- Built unified inbox integrating Meta's webhook and polling APIs, consolidating 4+ organization inboxes to help teams manage 200+ daily messages in one place.
- Eliminated wasted sprint hours by translating manager feedback into a vertically-sliced sprint plan, enabling a 3-person team to iterate in parallel without overlap and ship features faster.

Software Engineer

December 2025 – April 2026

Liza Bilal Enterprise Inc.

- Designed and shipped client-facing website on AWS, driving online customer acquisition to 200+ users through a fully deployed React frontend.
- Built internal REST API with Express.js to automate report generation, eliminating manual workflow overhead and saving 2+ hours of administrative work weekly.
- Slashed initial page load time by 22% by profiling and optimizing static assets through compression, lazy loading and minification.

PROJECTS

Meal & Grocery Tracking Platform | Source Code

January 2026

- Built and shipped a meal planning platform adopted by 100+ users to eliminate weekly meal planning time, integrating 3 external REST APIs across 400+ recipes and reducing meal planning time by 2 hrs/week per user through data normalization.
- Deployed on AWS (EC2/RDS) with React and Spring Boot, configuring CloudWatch alerts across 4+ services, sustaining 90% uptime through proactive incident detection.
- Implemented automated CI/CD pipeline using Docker with JUnit and Mockito, achieving 86% test coverage.
- Decreased average response time by 16% through caching strategies on high-traffic recipe endpoints, improving responsiveness for the platform's growing user base.

Rental Search App | Source Code

May 2026

- Engineered full-stack rental search platform powering 150+ successful apartment searches by aggregating listings from multiple sources and returning results in under 30s.
- Deployed a CI/CD pipeline targeting GKE and Artifact Registry, utilizing Docker multi-stage builds to ensure immutable, repeatable deployments, reducing environment-related failures by 20%.
- Scaled listing ingestion to 140+ results per search by dispatching RabbitMQ tasks to GKE worker pods, achieving stable parallel throughput across scraping and scoring pipelines.

LEADERSHIP & ACTIVITIES

President

December 2025 – Present

Google Developer Groups at Seneca Polytechnic

- Grew chapter reach to 120+ student attendees per term by leading 3+ technical workshops on development concepts and industry tools.

Group Leader

May 2026 – Present

AWS Student Builder Groups at Seneca Polytechnic

- Elevated cloud engineering proficiency for 75+ students by founding AWS- community on campus and designing a 8-event AWS technical curriculum.

SKILLS

Programming: Java, JavaScript/TypeScript, C, C++, HTML, CSS

Frameworks & Libraries: Spring Boot, React.js, Node.js, Express.js, JUnit, Mockito, Jest

Cloud & DevOps: GCP (GKE, GCE), AWS (EC2, RDS), Docker, Kubernetes, CI/CD (GitHub Actions)

Tools: VsCode, Git, Jira, Claude, Cursor

Databases: PostgreSQL, MongoDB, Oracle
